

Autumn Meeting Agenda

LED Lighting

Bill Welch C.Dir FIOD, CEO Lumenlinks Ltd

Bill will be presenting on the topic of LED Lighting, covering compliance and the pitfalls of choosing the wrong LED and indeed the company's which you purchase from.

Bill Welch has been in the lighting industry for over 30 years, of which 18 years were as a Company Director within major corporate and family business environments. Working within the lighting and electrical industries spanning national maintenance: PFI: installation contracting: design: manufacture: international sourcing: distribution of lighting products both in UK and international markets. He has worked across many sectors including Retail: Transport: Electrical Wholesaling: FM: Electrical Contracting: Government: National Chartered Associations.

He qualified as Chartered Director in 2010 and is a Fellow of the Institute of Directors, he works closely with the LIA / NIC EIC and many other industry associations

Four years ago he decided that lighting maintenance was going to dramatically decline with the introduction of LED. He is currently Chairman of Microcold Ltd, CEO of Lumenlinks Ltd, Non Exec Director of Wheelsure Holdings PLC & Luminous innovations & PyroPanel TM. In all these positions he is bringing new and ground breaking LED Lighting products to market designing and sourcing worldwide. For further information view Bill's [website](#)

Fire Safety Design for Schools – Building Bulletin (BB) 100 Revised Paul Munns, BSc, CEng, CIBSE and MIFE, Principal Fire Consultant, Atkins

Following on from his highly popular presentation at the Study Day, Paul will be giving an update on BB100, setting out the changes made.

Published in 2007, BB 100 advised on how to design school buildings so that they satisfied Building Regulations Part B, "Fire Safety". It needed revising for a number of reasons, but particularly because some of its content was out of date, it needed simplifying and it was far too long. These changes had to be made without diminishing or compromising the overriding importance of ensuring the safety of pupils, staff and visitors if a fire does occur in a school.

A new version has been produced which achieves those aims and is half the length of the original. Paul sets out in detail the main technical changes that have been made.

Paul is an Associate Director and principal fire consultant leading the fire engineering team within Atkins Infrastructure division. He is responsible for leading a team of 11 fire engineers that deliver fire safety strategies on projects ranging from New Nuclear Build, numerous rail projects, including Crossrail and many education buildings, as well as commercial developments. The team also provides fire safety consultancy advice large international infrastructure projects and the team have strong experience in applying international fire codes and best practice.

Autumn Meeting Agenda

Counting House, London
<http://the-counting-house.com/find-us/>
Tuesday 20th September March 2016

PROGRAMME AND AGENDA

Meeting chairman for the day tbc

10.15 am Tea/Coffee

10.45 am Meeting start, with brief overview of the day.
